### **3.1.2 Alignment of County Fiscal Strategy Paper 2026 with the National Objectives in the Budget Policy Statement 2026**

**Mr. Speaker Sir,**

The County Fiscal Strategy Paper (CFSP) should be aligned with the national Budget Policy Statement (BPS) 2026, to ensure that county priorities complement national fiscal objectives. This alignment is critical in securing funding allocations, leveraging national economic policies, and optimizing the county's fiscal space.

Therefore the CFSP should mirror BETA's five key pillars, which are expected to drive national and county-level growth as follows:

1. Agricultural Transformation aimed at enhancing food security, promoting crop diversification, and modernizing agricultural value chains through County Aggregation and Industrial Parks. Strengthening extension services, improving livestock productivity and disease control, and expanding agricultural insurance schemes to build climate resilience and ensure sustainable farmer incomes
2. Micro, Small, and Medium Enterprises (MSMEs) Economy focused on financial support, market linkages, and infrastructure for small businesses through support incubation, mentorship, market linkages, and access to affordable workspaces and common user facilities.
3. Healthcare provision through Universal healthcare coverage expansion by integrating Primary Healthcare Networks, expansion of community health services, and deployment of sufficient medical personnel. Sustainable financing mechanisms, digital health platforms, improved medicine supply chains, and patient safety initiatives will be central to ensuring equitable access to quality healthcare services.
4. Housing and Settlement through expanding affordable housing and urban planning and promoting planned rural and urban settlements. Expanding housing finance, supporting housing cooperatives, implementing climate- resilient designs, and improving market infrastructure are key to increasing homeownership, stimulating job creation, and fostering inclusive urban development
5. Digital Superhighway and Creative Economy through expanding digital connectivity, digital jobs, and the creative industry, fiber networks, public Wi-Fi, and digital hubs. The County will build digital skills among youth, digitization of government services, robust cyber-

security, and support for the creative economy including film, music, arts, and digital content are prioritized to drive innovation, youth employment, and economic diversification.
